

WAFFLE POD SLAB SYSTEMS

ENVIROCLAD Waffle Pod Slab Systems

The Enviroclad Waffle Pod Slab System has been designed to reduce costs, reduce concrete use, reduce slab installation time, and provide a stronger, more stable concrete slab while adding a thermal insulation benefit in the floor of up to R1.0 (W/mK Thermal Resistance). Overall energy consumption is reduced through assisting the house to stay warmer in the winter and cooler in the summer.

Reduced effects of soil movement

Reduced costs through lowering the amount of concrete in slab

Available in various sizes

225mm

300mm

375mm

Others upon request

Accessories include

4 Way spacers
 Pod Mesh Rails

Reduced construction time
